

Greeter

```
graph BT; GreeterServiceImpl[coappbrpc::api::GreeterServiceImpl] --> Greeter[Greeter];
```

A UML class diagram showing a relationship between two classes. The class 'Greeter' is represented by a white rectangle with a thin grey border at the top. Below it is a grey rectangle with a thick black border representing 'coappbrpc::api::GreeterServiceImpl'. A solid blue arrow points from the bottom center of the grey rectangle up to the bottom center of the white rectangle, indicating that the grey class implements the white class.

coappbrpc::api::GreeterServiceImpl
